IloT Infrastructure Conference

@ Hannover Messe 2019

Thursday, 4 April 2019, 13:00 to 19:00

Hannover Messe Conference Center: Room Bonn

The IMC, the largest organization dedicated to the IoT sector with 25,000 enterprise users and OEMs as members, will present an afternoon of panel discussions at Hannover Messe International (HMI) on the most important practical issues facing IloT deployments today. HMI attendees can register for the conference **free-of-charge**, and panel sessions will conclude with a networking reception hosted by AWS.

13:00 **Session 1: Connectivity Choices that Fit Applications**

Moderator: Pierce Owen, Principal Analyst, **ABI Research**
Speakers: Kim Bybjerg, VP IoT & Mobility, **Tata Communications**
Martin Kaufmann, Sr. Director Vendor Management, **Inmarsat**
Didrik Moe, Int. Bus. Dev. Global IoT, **BICS**
Myriam Recha, Director Local Fixed and Video/TV Design, **Vodafone**

There have always been choices for connecting industrial devices, but service providers are offering more tailored solutions than ever before. Two examples: low-cost, low-power wireless can save money and increase life-cycles, while micro-satellites could change the face of ubiquitous coverage for supply chain.

14:30 **Session 2: Control Hardware Evolves at the Edge**

Moderator: Keith Kreisher, Executive Director, **IoT M2M Council**
Speakers: Volkhard Bregulla, VP Mfg, Auto, & IoT, **HPE**
Sara Brown, VP of Marketing, **Multi-Tech Systems**
Andreas Burghart, Principal Solution Sales Engineer, **Digi International**
David DeLaRosa, VP, deviceWISE Industry 4.0, **Telit**

Increased computing power at the network's edge is bringing myriad advantages, making predictive maintenance and AI tenable for remote, industrial applications. This session will cover the breadth of the edge, from intelligent actuators/sensors, through data aggregation, into edge IT pre-processing.

16:00 **Session 3: Sourcing IloT Software Platforms**

Moderator: Robin Duke Woolley, CEO & Founder, **Beecham Research**
Speakers: Dirk Didascalou, VP IoT, **Amazon Web Services**
Syed Zaeem Hosain, Chief Technical Officer, **Aeris Communications**
Fred Yentz, President, Strategic Partnerships, IoT Services, **Telit**

There has been an explosion in the number of options for software that manages IloT deployments, and this session will use the template RFP created by the IMC as its guide. This session will cover device management, connectivity management, ERP/CRM software integration, analytics, security, and more.

15:30 **Networking Reception**

Join the IMC and network with the IoT industry's leading experts over beer, wine and canapés. The reception is hosted by **Amazon Web Services in Hall 6 Stand F46**
