

LOOXR

SMART. TRANSPARENT. EFFICIENT.

LOOXR digitizes the
compressed air value chain

Main industries for compressed air

Food and Beverage

Pharmaceutical

Chemical

Automotive

Electronics

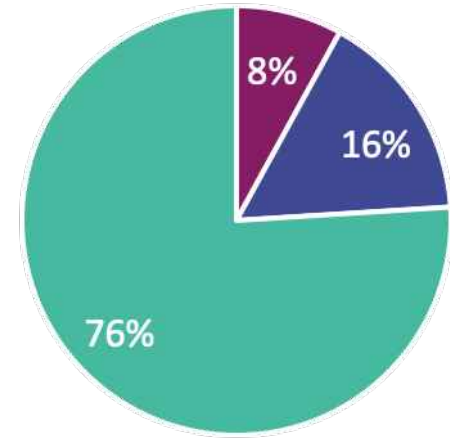

Manufacturing

Iron & Steel

Facts about compressed air

- 1 | One of the most expensive forms of energy
→ 30% of electricity consumption of an average industrial company
- 2 | Inefficient form of energy
→ Up to 50% of energy cost savings
- 3 | Life-cycle costs of a compressed air system
- 4 | Analogue industry
→ No transparency
- 5 | Generation by oneself
→ High investment costs
- 6 | Dependency on manufacturer

8 % maintenance costs
16 % investment costs
76 % energy costs

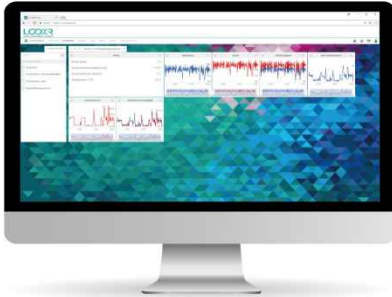

LOOXR – Smart. Transparent. Efficient.

Pay per Use

LOOXR Compressed Air 4.0

LOOXR – from analogue compressed air to a digitized business model

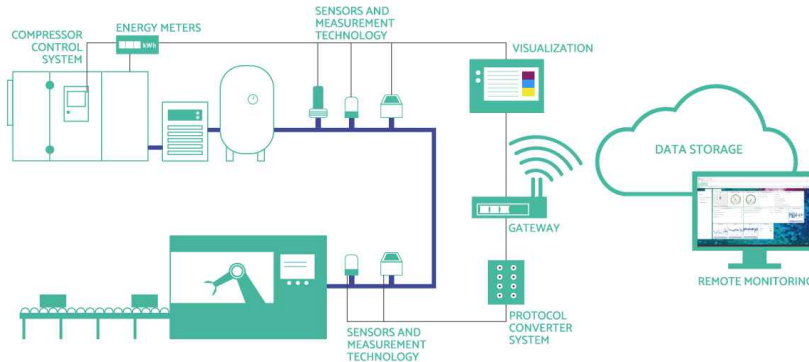

Challenges in the compressed air market, Status Quo:

- Generation by oneself → high investment costs
- No transparency
- Consumption based on theoretical/ calculated values
- Manufacturer dependency

The new Status Quo:

- Pay per Use, Compressed Air as a Service
- 100% transparency, up to 50% Energy savings
- Exact data on consumption, real-time data
- Manufacturer independency
- 24/7 accessibility, compliant with EU – GDPR
