

# Smart Urban Logistics – An easy Way!?

## Sustainable Cities require smart Transport Solutions

Urban logistics is one of the challenges growing cities have to face if they want to be successful and sustainable in the future offering people a high quality of life.

The **Swedish City of Gothenburg** and it's host at the HANNOVER MESSE – the **City of Hanover** – are investing a lot of efforts to realize effective logistic approaches that sometimes need brave decisions by companies, authorities and/or politicians.

**Get some Take-Aways** from Presentations like ...

- *My Hannover 2030 and the role of "Urban Logistics" | City of Hanover*
- *Gothenburg's Success-Factors for Electric Climate Smart Urban Logistics | Gothenburg City*
- *Saving 30% of Costs and Emissions by Intelligent Routing and Dynamic Travelling-Salesmen-Solutions on the Last-Mile graphmasters | Leading Startup Navigation and Traffic-management-Solutions | Germany*
- *Opportunities for City-friendly Last-mile-delivery with Containerisation and City Hubs | Velove – Pioneer in integrated Cargo-Bike and flexible mini container-solutions | Sweden*

**Discuss** with Company Representatives from Velove, graphmasters, DHL, IVL -Swedish Environmental Research Institute Gothenburg and Representatives of the Authorities

**Get inspired by this Swedish-German Express-Conference right at the start of the HANNOVER MESSE 2019!**
