欢迎辞

Dr. Andreas Gruchow  
Member of the Board  
Deutsche Messe AG

Deutsche Messe  
Hannover · Germany

On behalf of the organizers, we warmly welcome all participants to the 2<sup>nd</sup> BIOTECH CHINA 2008 in Shanghai.

At BIOTECH CHINA 2008, about 121 companies from 15 countries will showcase their latest innovative technologies and services in the biotechnology, pharmaceutical/medical technology and healthcare sectors on 1,846 sqm of exhibition space. We are especially proud to present an official German national pavilion for the first time, supported by the “Foreign Trade Show Support Programme” of the Federal Ministry of Economic Affairs and Technology of Germany. This together with the first-time attendance of for example the Spanish and Austrian biotech associations as well as the attendance of the Arizona Department of Commerce strongly indicates the increasing international importance of BIOTECH CHINA on its way to becoming the most important and influential platform for the life science sector in the Asia-Pacific region.

Next to the growing international exhibitor base, this years' BIOTECH CHINA will feature several lectures within the Innovation Forum on site, which will also be the location of the first “Bio-Career Day”, an international platform for companies to recruit young talents.

I warmly welcome and encourage all participants to tap on the wealth of international experience and expertise gathered in Shanghai for BIOTECH CHINA 2008. This event offers a unique forum for leading industrialists and scientists to gather information about current topics and trends and the development and commercialization of new products. By bringing together companies, visitors, and representatives from all around the globe, I am confident that we all will benefit from the exchange of new ideas and knowledge.

I wish all participants an enjoyable and successful stay in Shanghai at BIOTECH CHINA 2008. We are already looking forward to welcoming you again from June 1 – 3, 2009 to BIOTECH CHINA 2009!

我谨代表主办方，热烈欢迎所有参与来到 BIOTECH CHINA 2008 展会的朋友们。

本次展会吸引了全球范围内来自 15 个国家/地区的近 121 家展商前来参展。他们将会为我们展示在生物、制药和医疗保健领域最为前沿的创新技术和服务。同时我们也十分荣幸能够首次由官方组织德国国家展团前来参展，此计划被列入了德国“出国展会资助计划”，得到德国联邦经济事务及技术部的资助。此外，加上诸如西班牙和奥地利生物技术协会和美国亚利桑那州商务部的参加，BIOTECH CHINA 已经显露出巨大的国际关注度，并将致力于成为亚太地区最为重要和具影响力的生命科学产业的平台。

在不断壮大的国际参展的基础上，今年 BIOTECH CHINA 的现场活动之一“创新论坛”将会给观众带来数场专业讲座。而论坛的场地也将被用作首次举办的 Bio-Career 日——一个为企业招贤纳士的平台。

我诚挚地欢迎并鼓励所有的参与者在 BIOTECH CHINA 2008 齐聚一堂，分享彼此的经验和知识。本次活动还为行业内顶尖的企业家和科研工作者提供了一个独特的论坛，以便收集有关当今最新的话题、发展趋势和新产品的商业化等内容的信息。通过让全球范围内的企业、观众和与会代表产生互动，我相信所有的参与者通过创意和知识的交流都能从中得益匪浅。

我祝愿所有的参与者在上海及 BIOTECH CHINA 2008 期间，诸事顺利，马到功成。并且期待在定于明年 6 月 1 日~3 日举行的 BIOTECH CHINA 2009 上与您再次相见！

On the occasion of the launch of BIOTECH CHINA 2008 in Shanghai, I would like, on behalf of Shanghai Technology Convention & Exhibition Co., Ltd., one of the organizers of the event, to extend a warm welcome and heartfelt thanks to you for your participation in the event.

Combining by “3 exhibitions and 1 conference”, BIOTECH CHINA had its first event in 2007 with pathbreaking success. Organizers’ resource integration provided customers more effective reward. With the support from the societies, exhibitors and professionals of the circle, the event in 2008 will further upgrade its scale and influence with the characteristics of higher international level, broader coverage of industrial chains, and richer business programs. When over 120 exhibitors from different parts of the world display their newest technologies, products and solutions of biotechnology, instruments and apparatus, the 10th Shanghai International Forum on Biotechnology and Pharmaceutical Industry (BIO-FORUM) will be held at the Shanghai International Convention Center at the same time.

As known to all, the 21st century is a century for life sciences. Chinese government attaches great importance to the development of life sciences and has declared the biotechnology and pharmaceutical industry as one of the important research fields with priority in development. Advanced instruments and apparatus are indispensable for the research and development of new technologies. China’s market contains huge potential, and the Yangtze Delta with Shanghai as the center is an ideal place for your business development. We believe that BIOTECH CHINA 2008 will be a platform that combines exhibition and conference, academics and applications. You may take this opportunity to learn the most recent information about R & D, manufacture and services of this circle in China and the world more thoroughly, which can help you get more cooperative opportunities.

#### Abstract

Bioscience: An Arizona Growth Industry - Arizona's core internationally recognized strengths include: bioengineering, cancer research, and neuroscience. Since 2002, the bioscience industry in Arizona has been booming. Bioscience establishments in Arizona increased 17% during 2002-06, outpacing the U.S. average of 11% while bioscience jobs increased 18% during this period within the state, compared to 6% throughout the U.S. Global organizations that have recently taken advantage of Arizona's booming biotechnology industry include Abraxis BioScience, Roche and GORE Medical Products.

The state of Arizona has also recently developed a series of investment incentives, such as the Innovation Accelerator Program and Translational Accelerator, LLC (TRAC) that foreign companies will find attractive. The Innovation Accelerator Program was launched in 2007 and offers a unique combination of grants, tax credits, seminars and other tools necessary to evaluate, develop, and commercialize technologies currently under development. The TRAC fund was established by leading Phoenix-area bioscience and investment professionals to invest exclusively in early-stage bioscience companies.

#### 摘要

生命科学: 亚利桑那州发展中的产业——亚利桑那州本产业中的核心力量包括: 生物工程、癌症研究和神经科学。从2002年以来, 亚利桑那州的生命科学产业进入了飞速发展阶段。生命科学的建设在2002年到2006年之间增长了17%, 超过了全美国平均11%的增长速度。同时, 行业内职位数量也增长了18%, 远远高于全国6%的平均水准。一些全球企业, 包括Abraxis BioScience, Roche and GORE Medical Products等, 都得益于产业的飞速发展。

亚利桑那州政府最近也出台了一系列促进投资的举措, 例如创新加速计划、移动加速器和LLC (TRAC)基金。这些项目均得到了国际范围内的关注。创新加速计划从2007年开始实施, 将审批、税收和研讨会有机结合, 以此来评估、发展和商业化目前的研究项目。TRAC基金的建立则带动了凤凰城地区的生命科学和投资专家对发展初期的公司进行投资。

### Abstract

Apeiron Biologics GmbH, located in Vienna, Austria, was founded by Josef Penninger MD, Director of the Institute of Molecular Biotechnology of the Austrian Academy of Sciences (IMBA). Apeiron is operational since October 2005, and the projects currently pursued are based on Josef Penninger's research activities:

APN 01: Development of recombinant human soluble Angiotensin Converting Enzyme 2 for therapy of the Acute Respiratory Distress Syndrome as well as cardiovascular and kidney diseases. This project enters clinical trials in 2008.

Cbl-b: Enhancing the immunoreactivity by molecules that inhibit Cbl-b, a critical negative regulator of T-cell activation and autoimmunity, as novel cancer therapy.

DREAM: Novel approach for pain management by induction of the expression of the endogenous opioid precursor prodynorphin via interaction with the repressor protein DREAM.

Apeiron's general strategy is to generate value by developing therapeutics up to a proof of concept in patients (Phase I / II clinical trials), as basis for out-licensing/partnering, enabling the initiation of new projects.

### Abstract

The Industrial Park Höchst, until 1997 the headquarter site of the former company Hoechst AG, is strategically located in the center of Europe with excellent global logistic links through the Frankfurt Rhein/Main Airport (5 min. away by car). The main focus of its management company, Infraserv Höchst, is servicing companies from the areas of life sciences, big pharma companies as well as medium sized and small biotech companies. The service activities are organized around a "holistic" concept with integrated services centered on energies/utilities, waste disposal, facility management, environment/health, logistics, and general industrial park services like safety/security. Over the past 7 years, investments of over 3 billion € have been made in the Industrial Park Höchst. The number of companies residing in the Park is now over 90, with over 5000 new jobs created in the last 7 years alone. Infraserv Höchst is a certified auditor for global environmental management. It currently plans to further develop its biotech/life science cluster within the Industrial Park. In addition to attract new investors into the park, who want to enter the European and German market, Infraserv Höchst is also interested in consulting other site management companies on how to successfully develop their industrial park.

### Company Profile

Apeiron Biologics GmbH, located in Vienna, Austria, was founded by Josef Penninger MD, Director of the Institute of Molecular Biotechnology of the Austrian Academy of Sciences (IMBA). Apeiron is operational since October 2005, and the projects currently pursued are based on Josef Penninger's research activities.

The main project of Apeiron is the development of recombinant human soluble Angiotensin Converting Enzyme 2 (APN01) for therapy of the Acute Respiratory Distress Syndrome (ARDS) as well as cardiovascular and kidney diseases. This project enters clinical trials in 2008.

In addition, Apeiron has two projects in early stage pre-clinical development: A novel approach for pain management by induction of the expression of the endogeneous opioid prodynorphin, and a project in cancer immunotherapy by modulation of the immunoreactivity of relevant effector cells.

#### Company Profile

*Xema-Medica Co., Ltd. (formerly Xema Research and Production Co., Ltd) is a private company established 02/93 in Moscow. The word "Xema" does not mean anything neither in Russian nor in any other language we know. Our logo is fully meaningless as well, though it provides a vast field for allusions.*

We started our operations as the contract manufacturers of human antigens; now our company is among world leaders in production of tumor marker antigens and some autoantigens. Our own hybridoma collection enables us to manufacture large quantities of purified monoclonal antibodies for *in vitro* diagnostic use. We are proud to maintain a high level of research work focused on several main research topics:

- biochemistry and immunology of **glycoprotein tumor markers** (CEA, CA125, CA19-9, MUC1 etc.);
- serological markers of **celiac disease and interstitial lung diseases**;

Scientific partners of our company include leading universities and clinics all over the world (Moscow State University, Russian Oncological Scientific Center of the RAMS, the Central Scientific and Research Institute for Gastroenterology, the Scientific and Research Institute for Pulmonology, The Institute of Cytology of the RAS, the Institute of Bio-Organic Chemistry of NAS of Belorussia, Universities of Melbourne (Australia), Pittsburg (USA), Turku (Finland).

Since 1997, we have entered a very tough market of finished *in vitro* diagnostic reagents with the broad panel of EIA kits, including determination of hormones, tumor markers, thyroid autoimmunity

markers and infection serology. All our kits are based on an open and simple assay technology - 8x12 microwell breakable strips and photometry at 450 nm. All components are liquid and ready-to-use, addition of samples is monitored by color change of the incubation/dilution buffer. We always try to offer most economical solutions for the markets with restricted budgets.

Besides, our company developed a number of kits for research use - Alveomucin EIA (diagnostics and monitoring of interstitial lung diseases), ultra-sensitive CRP and PAPP-A EIA (prediction of risk of coronary disease), EIA kits for quantitative determination of immunoglobulin classes and subclasses in body fluids, etc. - as well as kits for veterinary use (progesterone in cow's milk and horse serum, steroids, thyroids and infection serology in feline and canine sera), reagents for immunohistochemistry, immunocytochemistry and flow cytometry.

Since 2003, our IVD kit production and sale is certified by **ISO 9001**. In the same year, we built a new modern factory for manufacturing ELISA kits designed in accordance with GMP rules. In the end of 2003, we organized a joint venture with our colleagues from Minsk, Belorussia to manufacture and sell our kits in this region. In October, 2004 we opened our subsidiary in St-Petersburg, Russia. Since 1999, Xema-Medica offers IVD kits and their components for Russian and international markets. We export our products to C.I.S. countries, Germany, Italy, UK, Belgium, China, Turkey, Iran. Annual turnover in 2007 reached ca 3.5M USD.
