Hannover Messe comes
to Russia!

INDUSTRIAL TRADE FAIR MOSCOW/ ITFM 2010

ITFM successfully combines four trade events held at the same time in the same place. Industrial Trade Fair Moscow/ ITFM showcases industry developments and new technologies in the fields of industrial automation, factory and process automation, industrial surface treatment, materials handling and logistics.

Why go to RUSSIA?

Russia has a long engineering tradition. Modernization and increasing demand for plant and machinery now make this one of the most important markets in Europe. In 2007, the country produced machinery and accessories with a value of EUR 22 billion (+19% compared to the year before). From January to September 2008 imports rose to \$ 218,5 billion (+42%). Over 50% of all imports are plant and machinery, equipment and vehicles (\$ 106,9 billion). Modern machinery is experiencing strong demand in order to modernize the country's production processes.

CeMAT RUSSIA is the new important international show for Materials Handling and Logistics, covering everything from forklift trucks to services and tailor-made solutions for individual sectors.

CeMAT RUSSIA will give you the unique picture of all the latest developments in the fields of mechanical handling, warehouse technology and workshop equipment, packaging and order picking equipment, loading technology, entire systems for materials handling technologies, intralogistics, systems and software for intralogistics, logistics services and outsourcing.

Motion, Drive & Automation RUSSIA is introduced all about power transmissions systems: mechanical, electrical, hydraulic, pneumatic, sealing technology and lubrication, compressed air & vacuum technology. This is one of the largest sectors of the mechanical and plant engineering industry, power transmission and control.

Energy efficiency is the defining theme for the power transmission/fluid power displays. All sections of **MDA RUSSIA** – including hydraulic and electric drive systems, gearbox systems and bearings – featured energy efficiency solutions to impressive effect.

Industrial Automation RUSSIA is introduced the latest technologies innovations for Process Automation, Factory Automation, Integrated Industrial and Building Automation Systems.

Industrial Automation gives you a uniquely comprehensive overview of all areas of industrial automation. Industrial Automation providing platform for all the relevant engineering disciplines - from energy-efficient power transmission to precision instrumentation and control technology, attracting automation specialists from all parts of industry.

Surface RUSSIA 2010 presents surface technologies for all the links in the industrial processing chain. You as an exhibitor benefit from the unrivalled opportunities to present your company's product portfolio to potential customers.

Surface RUSSIA 2010 gives you a chance to meet an international line-up of manufacturers, users and suppliers.
