»As the supplier of the market-leading solution for service management in Germany, we regard a stand at CeBIT as an absolute must for our company. We were very pleased in 2010 by the high proportion of trade visitors in Hall 3. This led to some very serious inquiries relating to our central theme of Business and IT Alignment, and by the end of the week we had chalked up more new contacts than the year before.«

Dirk K. Martin, Managing Director of helpLine GmbH, Bad Camberg, Germany.

HANNOVER
1–5 MARCH 2011

Open Source pulls in the crowds

You'll see them – and they'll see you

→ New areas of application are being added all the time, and investment keeps on flowing in – Open Source is now recognised as one of the few crisis-proof engines of industry growth. And once again CeBIT 2011 gives this highly popular display area an excellent location in Hall 2. So make the most of the opportunity to present your products and ideas at this outstanding position – as part of Europe's most important commercial event for the Open Source community.

The topics everyone is talking about

- Cloud Computing
- Virtualisation and High Availability
- Mixed Environments
- Mobile Open Source
- Security
- Open Source Qualification and Training

The target groups you can expect to reach

- Network administrators
- IT officers from businesses of every size
- Software developers and Open Source community members
- IT officers from local government and public-sector organisations
- HR officers, HR departments
- Linux and Open Source users

»This year Univention GmbH has greatly extended its presence at CeBIT with a stand twice as large as last year's. This is the world's most important ICT trade fair, and we wanted to make a statement as Germany's leading supplier of Open Source infrastructure products. The decision turned out to be the right one. We are delighted with the number of business inquiries we have had, and with the calibre of the people we have met.«

Peter H. Ganten, Managing Director, Univention GmbH, Bremen, Germany.

Your choice of presentation options

→ To make your presentation a success we have teamed up with two highly experienced partners: the respected trade publisher Linux New Media AG and the trade show experts at Pluspol.

Open Source Forum

A daily program of high-calibre lectures and keynote speeches – also available online through video streaming.

Server Technologies, Business Storage and Virtualisation – where investors can find their new IT infrastructure

→ Increasing demands are being placed on computing centres in terms of data volumes and processing capacity. This calls for innovative solutions and technologies in order to ensure the management of data over extended periods of time and to deliver data security and scalability within a global IT infrastructure. Central areas of interest here include Virtualisation, Business Storage and Server Technologies. In Hall 2 CeBIT offers a first port of call for suppliers of solutions and services based on innovative new technologies. This hall is a favoured destination for international business buyers with major investment needs.

Virtualisation & Storage Forum

In addition to your own company stand in the exhibition area, you can also put your message across at the Virtualisation & Storage Forum. This is a great way to engage in direct dialogue with your target group. You'll also have an opportunity to present your latest solutions live at demo points or in the context of a corporate lecture.

“All in one” package for manufacturers

Complete exhibitor package with demo point and meeting area, plus daily lecture slot and guided tours.

The topics everyone is talking about

- Server and Desktop Virtualisation
- Disaster Recovery
- Data Deduplication
- SSD – Solid State Drive
- Data Management
- High Availability
- Secured Virtualisation

The target groups you can expect to reach

- IT dealers and manufacturers
- End customers
- Systems houses
- Consultants

»We are delighted with the way CeBIT has gone and with the number and calibre of visitors we have met. The new format for CeBIT, with its solutions-oriented display areas, is exactly the right way to go, in our opinion. In particular, the standard of inquiries has gone up again since last year, which raises expectations of a high ROI. The exhibitors at the Virtualisation & Storage Forum can look back on a very successful show.«

Claudia Ketzer, Head of Marketing, Arrow ECS GmbH, Virtualisation & Storage Forum, Fürstfeldbruck, Germany.
