

Pushing Performance

People | Power | Partnership

*We're off to a flying start:
As students at HARTING*

*Theory meets practice.
And you encounter
new possibilities.*

What possibilities does HARTING offer students?

HARTING is the global market leader in the industrial connector sector. Consequently we know how to bring things together, making us also the ideal starting point for you to combine theory and practice during your academic studies. We are waiting for you with many attractive positions, fair payment and, above all, promising career perspectives.

Whether while working on your final paper under our supervision, in the framework of a varied internship or as a working student while you complete your degree: At HARTING you work independently and on your own authority, with the opportunity to see practical applications up close and gain valuable experience.

Recipient of a
HARTING Technology
Group scholarship

*Is studying regenerative
energies at Bielefeld
University of Applied Sciences* ”

„Being made a part of the sponsorship program was a great confirmation of my academic performance - and for me personally, naturally it has boosted my motivation for the upcoming start in the working world. The scholarship that HARTING awarded allows me to concentrate wholeheartedly on my academic studies.“

A portrait of Regina, a young woman with long brown hair, smiling. She is wearing a dark blue button-down shirt. A large white curved arrow is positioned behind her on the left side.

Is studying engineering
management at the Bielefeld
University of Applied Sciences

„After my commercial training in another company, I completed the technical internship for my degree at HARTING. I was subsequently also hired on here as a working student. In addition to interesting and varied assignments, I am also being given a look into many different areas that are tied to my studies.“

Completing an internship
and writing his final
paper at HARTING

Is studying Health Promotion
through Organizational
Development at the Magdeburg
University of Applied Sciences

„HARTING focuses not only on its customers and products, but also on employee health – just right for me as a student in health promotion through organizational development. As a part of the team in the Learning and Organizational Development, Talent and Health Management Department, I have been able to apply what I learned at the university in actual practice with responsible assignments in company health management.“

Your career start with comfort factor.

A helping hand as you stand on your own feet.

Although independent work is the main point for all our students, it is important to us to always be there to assist and advise. This is why the HARTING mentor program has experienced employees who look after the newcomers. Mentors offer tips, guide the students through the daily work routine and are always available to answer questions.

New here? Make new contacts in StudentTalk.

You can also find answers in our StudentTalk platform, which allows students to get to know one another and compare notes. Presentations by technical and management staff members, fascinating events, field trips and much more are waiting for you.

Our housing for high achievers.

Espelkamp may be in the middle of Germany, but it is still far from home for many of our students. This is why we have set up our guest-house with economical accommodations. Here you can call a comfortable room in an ideal location home while you are working here.

Fairness obligates.

HARTING is a „Fair Company“. For us this means that we ensure excellent working conditions through transparency and pay each of our students an adequate expense allowance. And for you this means that a fair work environment is awaiting you, without hidden conditions or unpleasant surprises.

Pushing Performance

Do you have any questions?

We look forward to your message.
